

Instructions: A token economy system is a well-researched reinforcement method in which your child earns tokens for positive behavior. Earned tokens can be exchanged for desired rewards (e.g. activities, items or privileges).

To use your Special Learning token board, we recommend that you first laminate the board for the durability. Cut out the corresponding tokens and laminate those as well. Choose a reward that is motivating to your child and affix a picture of it in the large square on the token board. Affix one side of Velcro to the back of each token and the other side of Velcro to the spaces on the token board.
